

Mobile Integration with AVAYA Extension to Cellular

ECOTEL® VTM pro boosts your bottom line

4yourmobile
communication

- Use cell phones as extensions
- Transfer calls from cell phones
- Initiate conferences and call forwarding from cell phones
- Unlimited mobility
- VTM pro offers cost-effective solution
- Supports AVAYA FNE (Feature Name Extensions)

PBX features with cell phone applet

The AVAYA one-X Mobile software applet lets cell phone users access PBX features such as call transfers, conferences, call hold and speed dialing. Your mobile employees can forward their fixed line to a cell phone and then use the cell phone as a regular extension with a single telephone number.

Cost-effective solution with VTM pro

AVAYA one-X Mobile Edition is particularly cost-effective when used with ECOTEL® VTM pro since the gateway serves as a GSM interface for the AVAYA Communication Manager. This means the gateway provides interconnectivity between the Communication Manager and cell phone in the form of direct cell-to-cell calls that are not routed through the public switched telephone network (PSTN).

AVAYA one-X

Lets mobile employees access PBX features

+ ECOTEL® VTM pro

Makes cost-effective mobile-to-mobile calls

Make calls for 0 cents per minute

ECOTEL® VTM pro handles up to 32 mobile radio modules. You can outfit the gateway with SIM cards from different carriers. Companies can use business-rate SIM cards in the gateway and cell phones, allowing calls with no per-minute charge for only a small base fee.

VIERLING

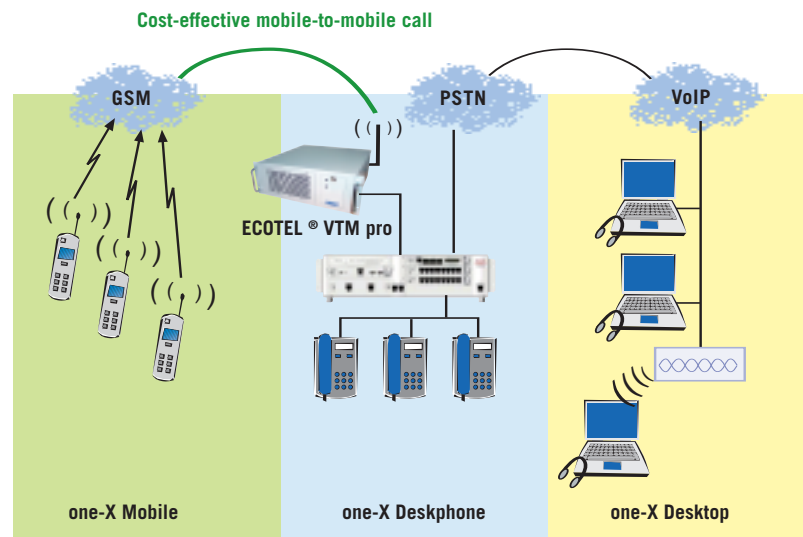

Use ECOTEL® VTM pro for cost-effective calls to GSM networks

The potential savings are huge when it comes to mobile radio rates. Many mobile radio operators offer low per-minute rates or even free calls within their own network if you pay just a small base charge.

ECOTEL® VTM pro provides interfaces from your company's PBX to different mobile radio networks so you can make more cost-effective "in-network" mobile radio calls.

Expensive fixed-to-mobile calls without ECOTEL® VTM pro

Cost-effective mobile-to-mobile calls with ECOTEL® VTM pro

PBX requirements:

- Avaya Communication Manager 3.x or higher
- Avaya Extension to Cellular
- T1/E1 ISDN PRI interface or H.323 IP trunk line for connection to ECOTEL® VTM pro
